EXPERIENCE

Remote Software Engineer (Frontend – Backend)
Freelance

📅 Oct 2021 – May 2022 (7 months)   📍 Dubai, United Arab Emirates

Built up noornft.io marketplace and bordo.network from zero
- Made a Cardano-based NFT marketplace from scratch using JQuery, Bootstrap and Gulp
- Learned about Web3 and NFTs by launching a generative Polygon-based NFT collection, made with NodeJS

Remote Software Engineer (Frontend – Backend)
PRAGMIDEA LTD.

📅 Jul 2020 – Oct 2021 (1 year 4 months)   📍 London, United Kingdom

The company provides software solutions to the most demanding FinTech businesses around the world
- Worked as the full-stack software engineer on a couple of busiest FinTech and trading platforms
- Generated an average of 60% test code coverage across several different applications using Cypress, Jest and React Testing Library
- Created a few internal projects from scratch using NextJS, Tailwind CSS and NestJS
- Accompanied the team on refactoring and reducing the bugs across all of our applications by more than 75%
- Decreased the build size of a few of our applications by around 50%

Software Engineer (Frontend – Backend)
Freelance

📅 Jan 2018 – Jul 2020 (2 years 6 months)   📍 Tehran, Iran

Developed Delta Insta Telegram Bot, Chopen FE, Dextractor, Sixmim, Monaxon and NajmX Crypto Wallet (currently offline)
- Experienced working with social media APIs
- Generated a total of $2K ongoing profit for a small home business by creating a Telegram bot for it
- Committed to the open-source society
- Learned Javascript, Typescript, ReactJS, NodeJS, NestJS, Tailwind CSS and a few other frameworks and libraries by building practical projects

STRENGTHS

⭐ My Willpower

My belief is that my willpower is my superpower which enables me to achieve my hardest goals.

⭐ Never Quit

If I fall 100 times, I'll stand up for the 101st.

⭐ Persistency

I believe if you study anything continuously, you can master it.
