EXPERIENCE

Fakir Technology Consultants GmbH - Sulzbach, Germany (Remote)   January 2024 - Present
Software Engineer
A consultancy company specializing in creation of high-quality software solutions across various industries.

• Spearheaded architectural and performance improvements, reducing bundle size by 12% and boosting development efficiency by 30%.
• Delivered 100+ features with zero critical bugs, contributing to a 25% user growth and enhancing satisfaction for 5,000+ users in Germany.
• Led and mentored a small team to optimize workflows, improve communication, and drive consistent, high-quality project outcomes.

Specific-Group Austria - Vienna, Austria (Remote)   July 2022 - December 2023 (1y 6m)
Software Engineer
SPG provides software solutions and consulting services to multiple customers and companies across Austria.

• Reverse-engineered and redeveloped a complex web application using new tools, achieving high client satisfaction.
• Delivered fast-paced, cross-functional projects on time through strong collaboration across frontend and backend teams in a multicultural environment.
• Combined technical expertise with effective communication to maintain and scale multiple production-grade applications.

Freelance - Dubai, UAE (Remote)   October 2021 - May 2022 (7m)
Software Engineer
Focused on Web3 and blockchain development projects.

• Developed and deployed a scalable NFT marketplace from the ground up, ensuring seamless performance and usability.
• Gained hands-on experience in Web3 and blockchain ecosystems by creating and launching a generative NFT collection.

PRAGMIDEA LTD. - London, UK (Remote)   July 2020 - October 2021 (1y 4m)
Software Engineer
A team of IT consultants with experience in implementing B2B and B2C projects worked in an Agile environment, with a strong focus on continuous delivery.

• Engineered and maintained high-traffic FinTech and trading platforms, improving stability and performance.
• Boosted code quality through comprehensive testing and refactoring, reducing bugs by over 75%.
• Optimized build efficiency, cutting application sizes by up to 50% and enhancing overall delivery speed.

Freelance - Tehran, Iran (Hybrid)   January 2018 - July 2020 (2y 6m)
Software Engineer
Developed various projects as a freelancer that helped small businesses, while learning the technologies.

• Developed automated solutions leveraging social media integrations, including a bot that generated $2K in recurring profit for a small business.
• Contributed to open-source projects and built practical applications to strengthen full-stack development expertise.
• Continuously expanded technical proficiency through hands-on projects, emphasizing scalable and maintainable software design.
